PROFILE

Software engineering student building web apps and PWAs that I publish online, moving toward artificial intelligence, cybersecurity and robotics. I am looking for internships and projects where I can learn by shipping real work.

EDUCATION

Licence 2, Software Engineering Technology
Université Aube Nouvelle, Bobo-Dioulasso · Oct. 2026 – present

Licence 1, Software Engineering Technology
Université Aube Nouvelle, Bobo-Dioulasso · Oct. 2025 – 2026

PROJECTS

- **English Master**: English-learning PWA: speech recognition, review mode, statistics, Android version via PWABuilder.
- **Signal Social**: morse-code messenger: SHA-256 hashed PIN, shared key via QR code, offline mode.
- **LecteurVoix**: multilingual text reader with language detection, speed and voice settings.
- **Contact Manager**: Python terminal app: regex email validation, file storage, interactive menu.
- **MERISE course**: data-modelling documentation: conceptual, logical and physical models.
- **Intellia (in development)**: AI learning platform for students, co-developed.
- **DigiSouk (prototype)**: Burkinabè digital marketplace with Orange Money and Moov Money.

SKILLS

Development: React, JavaScript, Python, HTML and CSS, SQL and MERISE, Git and GitHub, PWA and Android

Other: Management software, systems setup, digital marketing

Moving toward: Artificial intelligence, cybersecurity, robotics
